

Conducting and brainstorming session

A brainstorming session is conducted between our team mates to get ideas from individuals to create ideation phase

Questions after collaboration

How to gain customer trust?

How to keep the data secure?

How to present the output?

What hardware to be used?

Results of collaboration

Harish: Use cloud platforms for storage

Haari: Let user have control over the data

Kavin: Provide output via mobile app

Akhash: Arduino UNO can be used

Top Three Ideas

Use cloud platforms for storage

Provide output via mobile app

Arduino UNO can be used
